

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-3. (canceled)

4. (currently amended) A method ~~as recited in claim 1, for modifying a markup language document comprising:~~

receiving the markup language document at an intermediary server, the markup language document having at least one script portion including at least one link to a resource; and

modifying the at least one link within the script portion of the markup language document to link to the intermediary server, wherein said modifying comprises:

scanning the markup language document to locate the script portion;

searching the script portion to locate a hostname;

producing a replacement hostname for the located hostname; and  
replacing the located hostname with the replacement hostname.

5. (previously presented) A method as recited in claim 4, wherein the located hostname is associated with one or more remote servers, and the replacement hostname is associated with the intermediary server.

6. (previously presented) A method as recited in claim 5, wherein the located hostname is part of the at least one link.

7. (previously presented) A method as recited in claim 6, wherein the at least one link is a Universal Resource Locator for a resource.

8. (original) A method as recited in 5, wherein the markup language document is a HTML document.

9-23. (canceled)

24. (currently amended) [[The]] A non-transitory computer readable media of  
claim 20; including at least computer program code for modifying a markup language  
document, said computer readable media comprising:  
computer program code for receiving the markup language document at an  
intermediary server, the markup language document having at least a script portion  
including at least one link to another resource; and  
computer program code for modifying the at least one link within the  
script portion of the markup language document to link to the intermediary server,  
wherein the computer program code for modifying comprises:

computer program code for scanning the markup language document to locate the script portion;  
computer program code for searching the script portion to locate a hostname;  
computer program code for producing a replacement hostname for the located hostname; and  
computer program code for replacing the located hostname with the replacement hostname.

25. (currently amended) The non-transitory computer readable media of claim 24, wherein the located hostname is associated with one or more remote servers, and the replacement hostname is associated with the intermediary server.

26. (currently amended) The non-transitory computer readable media of claim 25, wherein the located hostname is part of the at least one link.

27. (currently amended) The non-transitory computer readable media of claim 26, wherein the at least one link is a Universal Resource locator for a resource.

28. (currently amended) The non-transitory computer readable media of claim 25, wherein the markup language document is a HTML document.

29-36. (canceled)

37. (currently amended) [[The]] A non-transitory computer readable media or claim 35 including computer program code that, when executed by at least one processor in an intermediary server, performs a method for processing requests, the computer readable media comprising:

computer program code for receiving, at the intermediary server, a request from a client device for an item;

computer program code for determining whether the item is a hyper text markup language (HTML) document;

computer program code for forwarding the item to the client device when the item is determined not to be a HTML document;

computer program code for performing, when the item is determined to be a HTML document, at least one of inserting a toolbar into the HTML document or replacing a uniform resource locator (URL) within the HTML document with a replacement URL to produce a modified HTML document, wherein the computer program code for replacing a URL comprises:

computer program code for scanning the HTML document to locate a script portion,

computer program code for searching the script portion to locate a hostname,

PATENT

U.S. Patent Application No. 09/706,297

Attorney's Docket No. 0023-0218

computer program code for producing a replacement hostname for  
the located hostname, and

computer program code for replacing the located hostname with  
the replacement hostname; and

computer program code for forwarding the modified HTML document to  
the client device.
